

EV Portable Charger Type 2 Mode 2

AG ELECTRICAL MANUFACTURE FACILITY

Features of EV Portable Charger Type 2 Mode 2

- Conform to the provisions and requirements of IEC 62196-2. High compatibility. It can charge all EV with Type 2 inlets, correctly and effectively.
- Using riveting pressure process with none screw, have a beautiful appearance. Hand-held design conform to the ergonomic principle, plug conveniently.
- The control box panel adopts display function, the current and voltage, the charging state and the temperature of the circuit board in real time.
- Excellent protection performance, protection grade of IC-CPD achieved IP66 and achieved IP55 of plug (working condition) High security. It has passed all tests of TUV. There are all kinds of protective measures to ensure the safety for every user.
- Adopted double color coating technology, custom color accepted (regular color orange, blue, green, grey, white).
- Easy operation. Simply connect the plug with the EV inlet, then the charger will automatically detect the connection status and handshaking protocol automatically, and starts charging.
- Switchable currents. Customers can choose an appropriate charging current according to the demand.
- Containing the intelligent chip. It can automatically repair minor charging problems while charging. When a fault occurs, the lights will blink in different ways to indicate different problems.
